

Software Intern (#719484)

Job Description:

In this position, you will be responsible for maintenance and improvements of development and testing infrastructure of cross-platform runtime libraries for multithreading. Your responsibilities will include but will not be limited to extension of build and test system, development and execution of performance benchmarks. You are expected to possess and employ relevant technical skills, ability to quick learning, to identify and implement improvements, and be able to work under close supervision as well as autonomously.

Qualifications:

You must be forth- or higher course student in Computer Science, Mathematics, or other technical discipline with relevant experience in IT area.

Other qualifications include:

- Good knowledge of script languages (bash, perl, etc.)
- Experience of work in cross-platform environment (Windows*, Linux*, Mac OS* X) is a plus
- English skills sufficient to conduct written technical communication

In addition, any of the following practical experience is considered an added advantage:

- Relevant experience of automation of build, test, defect management and other engineering processes
- Development and performance measurements of C/C++-based software
- System administration of hardware
