

## «Оценка стоимости компании»

The course will introduce students to the most frequently used quantitative valuation techniques. The main topics covered include (1) discounted cash flow methods (2) relative valuation using multiples (3) asset-based approach. Particular attention is paid to evaluation of individual groups of assets under the net asset value method: financial assets, real estate, tangible real property, intangible assets. The focus of the course is on the evaluation of companies in emerging capital markets. Students will learn how to conduct firm valuation in terms of high levels of macroeconomic uncertainty, illiquid capital markets, and high levels of political risks. Participants are provided with the opportunity to work in small teams and value different groups of assets and firms in emerging capital markets. The course is blended and consists of lectures along with seminars with lecturers from School of Finance and E&Y and online video lectures from the University of Illinois at Urbana-Champaign and Stern School of Business.
