Valentina Balyukevich, Ludmila Bychkova, Elena Chernovich, and Sergey Pakhomov

Science and Technology Indicators in the Russian Federation : Data Book. – Moscow : National Research University – Higher School of Economics (HSE), 2014. – 400 p.

This data book continues the series of publications on various aspects of S&T and innovation development in the Russian Federation. It presents statistical data reflecting the current state and trends in R&D and innovation. A specific chapter is devoted to international comparisons.

The publication uses information provided by the Federal State Statistics Service, the Ministry of Education and Science of the Russian Federation, Federal Service for Intellectual Property, Patents and Trademarks, CIS Statcommittee, Organisation for Economic Co-operation and Development (OECD), European Commission, Eurostat, UNESCO, World Intellectual Property Organisation as well as the results of methodological and analytical studies conducted by HSE Institute for Statistical Studies and Economics of Knowledge.

In several cases data on certain indicators improves on previous data.

CONTENTS

Main science and technology indicators	17
Main indicators of innovation.....	21
1. Institutions	25
1.1. R&D institutions by type.....	26
1.2. Trends in the total number of R&D institutions	27
1.3. Percentage distribution of R&D institutions by type	28
1.4. R&D institutions by ownership.....	29
1.5. Percentage distribution of R&D institutions by ownership	31
1.6. R&D institutions by organisational and legal form: 2012	32
1.7. Percentage distribution of R&D institutions by organisational and legal form: 2012.....	33
1.8. R&D institutions by economic activity	34
2. R&D Personnel.....	35
2.1. R&D personnel.....	36
2.2. R&D personnel by occupation	36
2.3. Percentage distribution of R&D personnel by occupation.....	37
2.4. R&D personnel by ownership of R&D institutions.....	38
2.5. R&D personnel by organisational and legal form of institutions: 2012	40
2.6. Percentage distribution of R&D personnel by organisational and legal form of institutions: 2012	41
2.7. R&D personnel by economic activity	42
2.8. R&D personnel by educational attainment	43
2.9. Percentage distribution of R&D personnel by educational attainment.....	44
2.10. Personnel working part-time and on contracts by category	45
2.11. Researchers by gender and age group.....	46
2.12. Percentage distribution of researchers by age group	48
2.13. Average age of researchers	49
2.14. Researchers with scientific degrees	50

2.15. Researchers with scientific degrees as a percentage of the total number of researchers	50
2.16. Researchers by field of science and technology.....	51
2.17. Percentage distribution of researchers by field of science and technology	52
2.18. Flows of R&D personnel	53
2.19. Trends in inflow and outflow of R&D personnel	54
2.20. Inflow of higher education graduates to R&D institutions.....	55
2.21. R&D personnel turnover.....	56
Postgraduate education	57
2.22. Main indicators of postgraduate courses' activities.....	57
2.23. Admission of higher education graduates to postgraduate courses by attendance status	60
2.24. Higher education graduates as a percentage of postgraduate courses' admission total.....	61
2.25. Postgraduate courses' students by gender	62
2.26. Postgraduate courses' students by gender and age group: 2012	65
2.27. Postgraduate courses' students by field of science and technology	66
2.28. Persons whose candidate degree awards were confirmed by the Ministry of Education and Science of the Russian Federation by field of science and technology	67
2.29. Main indicators of doctoral courses' activities	68
2.30. Doctoral courses' students by gender	71
2.31. Doctoral courses' students by gender and age group: 2012	73
2.32. Doctoral courses' students by field of science and technology	74
2.33. Graduates who have defended dissertations during the training term as a percentage of all graduates from postgraduate and doctoral courses by field of science and technology: 2012	75
2.34. Persons, whose doctor degree awards were confirmed by the Ministry of Education and Science of the Russian Federation by field of science and technology	76
3. R&D Funding	77
3.1. Gross domestic expenditure on R&D	78
3.2. Trends in gross domestic expenditure on R&D	79
3.3. Federal budget appropriations on civil S&T at current prices.....	80
3.4. Federal budget appropriations on civil S&T at current 1991 prices	81

3.5. Federal budget appropriations on civil S&T as a percentage of gross domestic product.....	82
3.6. Federal budget appropriations on civil S&T as a percentage of federal budget expenditure.....	83
3.7. Percentage distribution of federal budget appropriations on civil S&T by section of budget expenditure classification and type of activity	84
3.8. Gross domestic expenditure on R&D by source of funds	85
3.9. Trends in gross domestic expenditure on R&D by source of funds	87
3.10. Percentage distribution of gross domestic expenditure on R&D by source of funds	88
3.11. Grants and competitive research funding.....	89
3.12. Gross domestic expenditure on R&D financed from abroad.....	89
3.13. Percentage distribution of gross domestic expenditure on R&D financed from abroad	90
3.14. R&D funding by sector of performance: 2012.....	91
3.15. Gross domestic expenditure on R&D by ownership of R&D institutions.....	92
3.16. Gross domestic expenditure on R&D by organisational and legal form of institutions: 2012.....	94
3.17. Percentage distribution of gross domestic expenditure on R&D by organisational and legal form of institutions: 2012.....	95
3.18. Gross domestic expenditure on R&D by economic activity.....	96
3.19. Gross domestic expenditure on R&D by type of costs.....	98
3.20. Gross domestic expenditure on R&D by priority S&T area and source of funds: 2012.....	100
3.21. Percentage distribution of gross domestic expenditure on R&D by priority S&T area and source of funds: 2012.....	101
3.22. Gross domestic expenditure on R&D by socio-economic objective	102
3.23. Percentage distribution of gross domestic expenditure on R&D by socio-economic objective	104
3.24. Intramural current expenditure on R&D by type of activity and field of science and technology	105
3.25. Percentage distribution of intramural current expenditure on R&D by field of science and technology	107
3.26. Percentage distribution of intramural current expenditure on R&D by type of activity.....	108
3.27. Intramural current expenditure on R&D by type of activity as a percentage of gross domestic product	109

3.28. Average monthly salary of R&D personnel	110
4. R&D Fixed Assets	111
4.1. R&D fixed assets	112
4.2. Trends in value of R&D fixed assets	114
4.3. Machines and equipment as a percentage of the total value of R&D fixed assets	114
4.4. R&D fixed assets by ownership of institutions.....	115
4.5. Percentage distribution of R&D fixed assets by ownership of institutions.....	117
4.6. R&D fixed assets by economic activity.....	118
4.7. R&D intangible assets	119
4.8. Intangible assets included in R&D fixed assets	120
5. Sectors of R&D Performance	121
5.1. Aggregate indicators	122
5.1.1. R&D institutions by sector of performance	122
5.1.2. Percentage distribution of R&D institutions by sector of performance	123
5.1.3. R&D personnel by sector of performance and occupation.....	124
5.1.4. Percentage distribution of R&D personnel by occupation and sector of performance	125
5.1.5. R&D personnel by sector of performance and educational attainment	126
5.1.6. Percentage distribution of R&D personnel by educational attainment and sector of performance	127
5.1.7. Researchers with scientific degrees by sector of performance	128
5.1.8. Percentage distribution of researchers with scientific degrees by sector of performance.....	129
5.1.9. Researchers assigned to intern or work at foreign research institutions by sector of performance: 2012.....	130
5.1.10. Percentage distribution of researchers assigned to intern or work at foreign research institutions by sector of performance: 2012.....	130
5.1.11. Gross domestic expenditure on R&D by sector of performance	131
5.1.12. Percentage distribution of gross domestic expenditure on R&D by sector of performance	132
5.1.13. Gross domestic expenditure on R&D by sector of performance as a percentage of gross domestic product	133
5.1.14. Gross domestic expenditure on R&D by sector of performance and source of funds	134

5.1.15. Percentage distribution of gross domestic expenditure on R&D by source of funds and sector of performance	135
5.1.16. Grants and competitive research funding by sector of performance	136
5.1.17. Percentage distribution of grants and competitive research funding by sector of performance	137
5.1.18. Gross domestic expenditure on R&D by priority S&T area and sector of performance: 2012	138
5.1.19. Percentage distribution of gross domestic expenditure on R&D by priority S&T area and sector of performance: 2012	139
5.1.20. Share of sectors of performance in gross domestic expenditure on R&D by selected priority S&T area: 2012	141
5.1.21. Percentage distribution of gross domestic expenditure on R&D by priority S&T area and source of funds: 2012	143
5.1.22. Gross domestic expenditure on R&D by sector of performance and socio-economic objective	145
5.1.23. Percentage distribution of gross domestic expenditure on R&D by sector of performance and socio-economic objective: 2012	147
5.1.24. Intramural current expenditure on R&D by sector of performance and type of activity	149
5.1.25. Percentage distribution of intramural current expenditure on R&D by type of activity and sector of performance	150
5.1.26. Average monthly salary of R&D personnel by sector of performance	151
5.2. Government sector	152
5.2.1. R&D institutions in the government sector by type	152
5.2.2. R&D personnel in the government sector by type of institutions	152
5.2.3. R&D personnel in the government sector by occupation	153
5.2.4. Percentage distribution of R&D personnel in the government sector by occupation	153
5.2.5. Share of the government sector in R&D personnel total by occupation	154
5.2.6. R&D personnel in the government sector by educational attainment	155
5.2.7. Percentage distribution of R&D personnel in the government sector by educational attainment	157
5.2.8. Employees working part-time and on contracts in the government sector by occupation	158

5.2.9. Researchers in the government sector by gender and age group	159
5.2.10. Percentage distribution of researchers in the government sector by age group	160
5.2.11. Average age of researchers in the government sector.....	161
5.2.12. Researchers with scientific degrees in the government sector.....	161
5.2.13. Researchers with scientific degrees as a percentage of the total number of researchers in the government sector	162
5.2.14. Researchers in the government sector by field of science and technology	163
5.2.15. Percentage distribution of researchers in the government sector by field of science and technology.....	164
5.2.16. Flows of R&D personnel in the government sector by occupation.....	165
5.2.17. Inflow and outflow of R&D personnel in the government sector.....	166
5.2.18. Inflow of higher education graduates to R&D institutions in the government sector.....	167
5.2.19. Gross domestic expenditure on R&D in the government sector by type of institutions	168
5.2.20. Gross domestic expenditure on R&D in the government sector.....	169
5.2.21. Gross domestic expenditure on R&D in the government sector as a percentage of gross domestic product.....	170
5.2.22. Gross domestic expenditure on R&D in the government sector by source of funds	171
5.2.23. Percentage distribution of gross domestic expenditure on R&D in the government sector by source of funds	173
5.2.24. Share of the government sector in gross domestic expenditure on R&D by type of costs.....	174
5.2.25. Gross domestic expenditure on R&D in the government sector by type of costs.....	175
5.2.26. Intramural current expenditure on R&D in the government sector by type of activity and field of science and technology.....	176
5.2.27. Share of the government sector in intramural current expenditure on R&D by type of activity.....	177
5.2.28. Percentage distribution of intramural current expenditure on R&D in the government sector by type of activity	178
5.2.29. Average monthly salary of R&D personnel in the government sector.....	179

State Academies of Sciences	179
5.2.30. Number of R&D institutions in state academies of sciences	179
5.2.31. R&D personnel in state academies of sciences by occupation.....	180
5.2.32. Researchers with scientific degrees in state academies of sciences	182
5.2.33. Researchers in state academies of sciences by gender and age group	183
5.2.34. Gross domestic expenditure on R&D in state academies of sciences	190
5.2.35. Gross domestic expenditure on R&D in state academies of sciences by source of funds	191
5.2.36. Grants and competitive research funding in state academies of sciences.....	193
5.2.37. Share of grants and competitive research funding in gross domestic expenditure on R&D by state academies of sciences: 2012.....	194
5.2.38. Intramural current expenditure on R&D in state academies of sciences by type of activity and field of science and technology	195
5.3. Business enterprise sector	203
5.3.1. R&D institutions in the business enterprise sector by type	203
5.3.2. R&D personnel in the business enterprise sector by type of institutions	204
5.3.3. R&D personnel in the business enterprise sector by occupation.....	204
5.3.4. Percentage distribution of R&D personnel in the business enterprise sector by occupation	205
5.3.5. Share of the business enterprise sector in total R&D personnel by occupation	206
5.3.6. R&D personnel in the business enterprise sector by educational attainment.....	207
5.3.7. Percentage distribution of R&D personnel in the business enterprise sector by educational attainment	209
5.3.8. Employees working part-time and on contracts in the business enterprise sector by occupation	210
5.3.9. Researchers in the business enterprise sector by gender and age group	211
5.3.10. Percentage distribution of researchers in the business enterprise sector by age group.....	212
5.3.11. Average age of researchers in the business enterprise sector	213
5.3.12. Researchers with scientific degrees in the business enterprise sector.....	214
5.3.13. Researchers with scientific degrees as a percentage of the total number of researchers in the business enterprise sector	214

5.3.14. Researchers in the business enterprise sector by field of science and technology	215
5.3.15. Percentage distribution of researchers in the business enterprise sector by field of science and technology	216
5.3.16. Flows of R&D personnel in the business enterprise sector by occupation	217
5.3.17. Inflow and outflow of R&D personnel in the business enterprise sector.....	218
5.3.18. Inflow of higher education graduates to R&D institutions in the business enterprise sector	219
5.3.19. Gross domestic expenditure on R&D in the business enterprise sector by type of institutions	220
5.3.20. Gross domestic expenditure on R&D in the business enterprise sector	221
5.3.21. Gross domestic expenditure on R&D in the business enterprise sector as a percentage of gross domestic product.....	222
5.3.22. Gross domestic expenditure on R&D in the business enterprise sector by source of funds.....	223
5.3.23. Percentage distribution of gross domestic expenditure on R&D in the business enterprise sector by source of funds	225
5.3.24. Share of the business enterprise sector in gross domestic expenditure on R&D by type of costs.....	226
5.3.25. Gross domestic expenditure on R&D in the business enterprise sector by type of costs	227
5.3.26. Intramural current expenditure on R&D in the business enterprise sector by type of activity and field of science and technology	228
5.3.27. Share of the business enterprise sector in intramural current expenditure on R&D by type of activity	229
5.3.28. Percentage distribution of intramural current expenditure on R&D in the business enterprise sector by type of activity	230
5.3.29. Average monthly salary of R&D personnel in the business enterprise sector.....	231
5.4. Higher Education Sector	232
5.4.1. R&D institutions in the higher education sector by type.....	232
5.4.2. R&D personnel in the higher education sector by type of institutions.....	233
5.4.3. R&D personnel in the higher education sector by occupation.....	233
5.4.4. Percentage distribution of R&D personnel in the higher education sector by occupation.....	234

5.4.5. Share of the higher education sector in total R&D personnel by occupation	235
5.4.6. R&D personnel in the higher education sector by educational attainment.....	236
5.4.7. Percentage distribution of R&D personnel in the higher education sector by educational attainment.....	238
5.4.8. Employees working part-time and on contracts in the higher education sector	239
5.4.9. Researchers in the higher education sector by gender and age group	240
5.4.10. Percentage distribution of researchers in the higher education sector by age group	241
5.4.11. Average age of researchers in the higher education sector	242
5.4.12. Researchers with scientific degrees in the higher education sector	242
5.4.13. Researchers with scientific degrees as a percentage of the total number of researchers in the higher education sector.....	243
5.4.14. Researchers in the higher education sector by field of science and technology	244
5.4.15. Percentage distribution of researchers in the higher education sector by field of science and technology.....	245
5.4.16. Flows of R&D personnel in the higher education sector by occupation.....	246
5.4.17. Inflow and outflow of R&D personnel in the higher education sector.....	247
5.4.18. Inflow of higher education graduates to R&D institutions in the higher education sector	248
5.4.19. Gross domestic expenditure on R&D in the higher education sector by type of institutions	249
5.4.20. Gross domestic expenditure on R&D in the higher education sector	250
5.4.21. Gross domestic expenditure on R&D in the higher education sector as a percentage of gross domestic product.....	251
5.4.22. Gross domestic expenditure on R&D in the higher education sector by source of funds.....	252
5.4.23. Percentage distribution of gross domestic expenditure on R&D in the higher education sector by source of funds	254
5.4.24. Share of the higher education sector in gross domestic expenditure on R&D by type of costs.....	255
5.4.25. Gross domestic expenditure on R&D in the higher education sector by type of costs	256
5.4.26. Intramural current expenditure on R&D in the higher education sector by type of activity and field of science and technology	257

5.4.27. Share of the higher education sector in intramural current expenditure on R&D by type of activity	258
5.4.28. Percentage distribution of intramural current expenditure on R&D in the higher education sector by type of activity.....	259
5.4.29. Average monthly salary of R&D personnel in the higher education sector.....	260
6. R&D Output	261
6.1. Publications of Russian authors in scientific journals indexed in Scopus by document type.....	262
6.2. Publications of Russian authors in scientific journals indexed in Web of Science, by document type	262
6.3. Publications of Russian authors in scientific journals indexed in Scopus.....	263
6.4. Publications of Russian authors in scientific journals indexed in Web of Science	264
6.5. Share of publications of Russian authors in the global number of publications indexed in Scopus by field of science: 2012	265
6.6. Percentage distribution of publications of Russian authors in scientific journals indexed in Web of Science by field of science: 2008–2012.....	266
6.7. Patent applications and patents granted	267
6.8. Indicators of patent activity	268
6.9. Patents granted in the Russian Federation by section of the International Patent Classification.....	269
6.10. Percentage distribution of patents granted in the Russian Federation by assignee and section of the International Patent Classification: 2012.....	270
6.11. Utility model patent applications and patents granted	271
6.12. Utility model patents granted in the Russian Federation by section of the International Patent Classification	272
6.13. Registration of intellectual property in the field of Information Technology	273
6.14. Registration of internal license agreements and patent assignment contracts	274
6.15. Registration of internal license agreements and patent assignment contracts by technology field.....	275
6.16. Percentage distribution of internal license agreements and patent assignment contracts by technology field.....	276

6.17. Percentage distribution of internal license agreements and patent assignment contracts by category of partners.....	277
6.18. Technology balance of payments by category of contracts.....	278
6.19. Percentage distribution of technology exports and imports by category of contracts	280
6.20. Technology balance of payments by country.....	281
6.21. Percentage distribution of technology exports and imports by country groups.....	284
6.22. Technology balance of payments by sector of performance	284
6.23. Technology balance of payments by economic activity	285
6.24. Technology balance of payments by ownership of organisations.....	286
6.25. Development of advanced manufacturing technologies by type.....	287
6.26. Development of advanced manufacturing technologies by degree of novelty and type	288
6.27. Development of advanced manufacturing technologies by degree of novelty and economic activity	289
6.28. Development of advanced manufacturing technologies by degree of novelty and ownership of organisations	290
6.29. Use of advanced manufacturing technologies by type	291
6.30. Use of advanced manufacturing technologies by type and duration.....	292
6.31. Use of advanced manufacturing technologies by economic activity and duration	293
6.32. Use of advanced manufacturing technologies by ownership of organisations and duration	294
6.33. Use of advanced manufacturing technologies by type and source of acquisition: 2012	295
6.34. Use of advanced manufacturing technologies by economic activity and source of acquisition: 2012	296
6.35. Use of advanced manufacturing technologies by ownership and source of acquisition: 2012.....	297
6.36. Use of advanced manufacturing technologies on the basis of invention patents by type	298
7. Innovative Activity of Enterprises	299
7.1. Innovative activity of enterprises by type of innovation and economic activity.....	300
7.2. Enterprises engaged in technological innovation as a percentage of all enterprises by economic activity.....	303

7.3. Percentage distribution of enterprises engaged in technological innovation by innovative and economic activity	305
7.4. Sales of innovative goods and services by economic activity.....	311
7.5. Sales of goods and services produced with the use of marketing innovation by economic activity.....	313
7.6. Expenditure on technological, organisational and marketing innovation by economic activity	315
7.7. Percentage distribution of expenditure on technological, organisational and marketing innovation by economic activity	318
7.8. Percentage distribution of expenditure on technological innovation by innovative and economic activity	321
7.9. Percentage distribution of expenditure on technological innovation by source of funds and economic activity	327
7.10. Intensity of expenditure on technological innovation by economic activity	333
8. Public Attitudes towards Science and Technology.....	335
8.1. Sources of information about science and technology	336
8.2. Involvement of the population in science and technology issues: 2011	337
8.3. Public assessment of the influence of science and technology on life	338
8.4. Public assessment of the effects of S&T development	340
8.5. Public opinion about those responsible for the negative effects of S&T development	342
8.6. Public opinion about possible prohibition of research	343
8.7. Public opinion about financing research and introducing new technologies.....	344
8.8. Symbols of national prestige in Russia: 2011	346
9. International Comparisons	347
9.1. Gross domestic expenditure on R&D	348
9.2. Gross domestic expenditure on R&D as a percentage of gross domestic product: 2012.....	351
9.3. Percentage distribution of gross domestic expenditure on R&D by sector of performance: 2012.....	352
9.4. Percentage distribution of gross domestic expenditure on R&D by source of funds: 2012.....	355

9.5. Gross domestic expenditure on R&D by field of science and technology: 2012	358
9.6. Intramural current expenditure on R&D by type of activity: 2012	359
9.7. Government budget appropriations on R&D	360
9.8. R&D personnel: 2012	362
9.9. R&D personnel per 10 000 employment: 2012	365
9.10. Percentage distribution of researchers by sector of performance: 2012	366
9.11. Female proportion in the number of researchers: 2012	369
9.12. Percentage distribution of researchers in the government sector by field of science and technology: 2012	370
9.13. Percentage distribution of researchers in the business enterprise sector by field of science and technology: 2012	371
9.14. Percentage distribution of researchers in the higher education sector by field of science and technology: 2012	372
9.15. Publications and citations in scientific journals indexed in Web of Science: 2008–2012	373
9.16. Publications and citations in scientific journals indexed in Scopus: 1996–2012	376
9.17. Country shares in the total number of publications in scientific journals indexed in Web of Science: 2012	379
9.18. Country shares in the total number of publications in scientific journals indexed in Scopus: 2012	380
9.19. Country shares in the total number of citations in scientific journals indexed in Scopus: 2012	381
9.20. Publications in co-authorship with foreign researchers as a percentage of total country publications in scientific journals indexed in Scopus: 2012	382
9.21. Publications in co-authorship with Russian researchers as a percentage of total country publications in scientific journals indexed in Scopus: 2012	383
9.22. Patent applications filed by residents and non-residents at national patent agencies	384
9.23. Percentage distribution of patent applications by applicant and country: 2012	387
9.24. Patent applications filed by residents at national and foreign patent agencies	388
9.25. Triadic patent families	391
9.26. Receipts from technology exports and payments for technology imports: 2012	394
Technical notes	395

Symbols used in tables:

- ... data not available
and not included in the totals,
- data not applicable,
0.0 insignificant value.

In some tables, details may not add up to the total because of rounding.

MAIN SCIENCE AND TECHNOLOGY INDICATORS

2.19. TRENDS IN INFLOW AND OUTFLOW OF R&D PERSONNEL

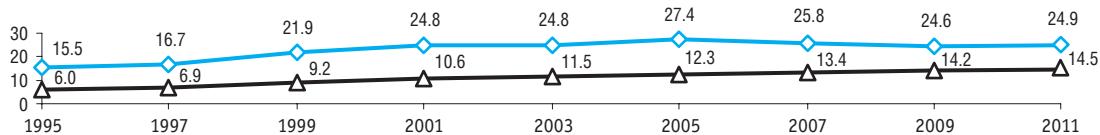

* The ratio of the R&D personnel admitted during the year to the number of employees at the end of the year.

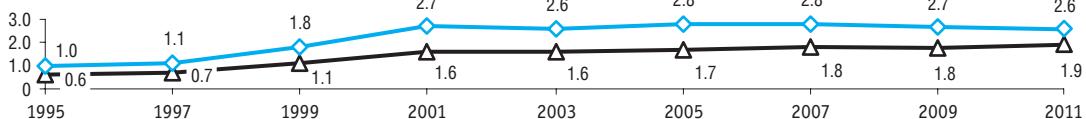

** The ratio of the R&D personnel having resigned during the year to the number of employees at the beginning of the year.

2.20. INFLOW OF HIGHER EDUCATION GRADUATES TO R&D INSTITUTIONS

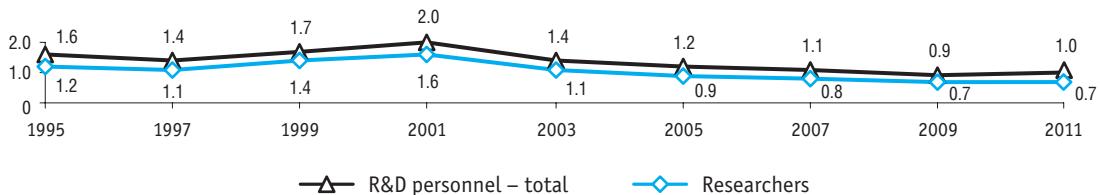

Higher education graduates as a percentage of the inflow to R&D institutions

Higher education graduates as a percentage of R&D personnel*

Inflow of higher education graduates to R&D institutions as a percentage of total higher education graduates**

—△— R&D personnel – total —◆— Researchers

* The ratio of the higher education graduates admitted during the year to the number of employees at the end of the year.

** Including private higher education institutions.

2.21. R&D PERSONNEL TURNOVER

	1995	1996	1997	1999	2001	2003	2005	2007	2009	2011
R&D personnel turnover ratio, by inflow*	0.099	0.093	0.098	0.119	0.152	0.142	0.138	0.135	0.131	0.135
R&D personnel turnover ratio, by outflow**	0.207	0.177	0.175	0.135	0.158	0.153	0.154	0.152	0.136	0.144
Workforce replacement ratio***	0.478	0.522	0.561	0.879	0.962	0.930	0.896	0.889	0.963	0.941

* The ratio of the R&D personnel admitted during the year to the average number of employees.

** The ratio of the R&D personnel having resigned during the year to the average number of employees.

*** The ratio of persons hired during the year to the number of persons having retired during the same period.

Postgraduate education

2.22. MAIN INDICATORS OF POSTGRADUATE COURSES' ACTIVITIES

	Number of institutions <i>(at the end of the year)</i>	Enrolment, <i>head-count</i> <i>(at the end of the year)</i>	Entrants, <i>head-count</i>	Graduates, <i>head-count</i>	Of whom with defended dissertations, <i>head-count</i>

at constant 1989 prices	2485.4	3321.2	4608.4	4547.5	4939.9	5577.5	5490.8	6067.0	5723.2	5779.3	6107.0

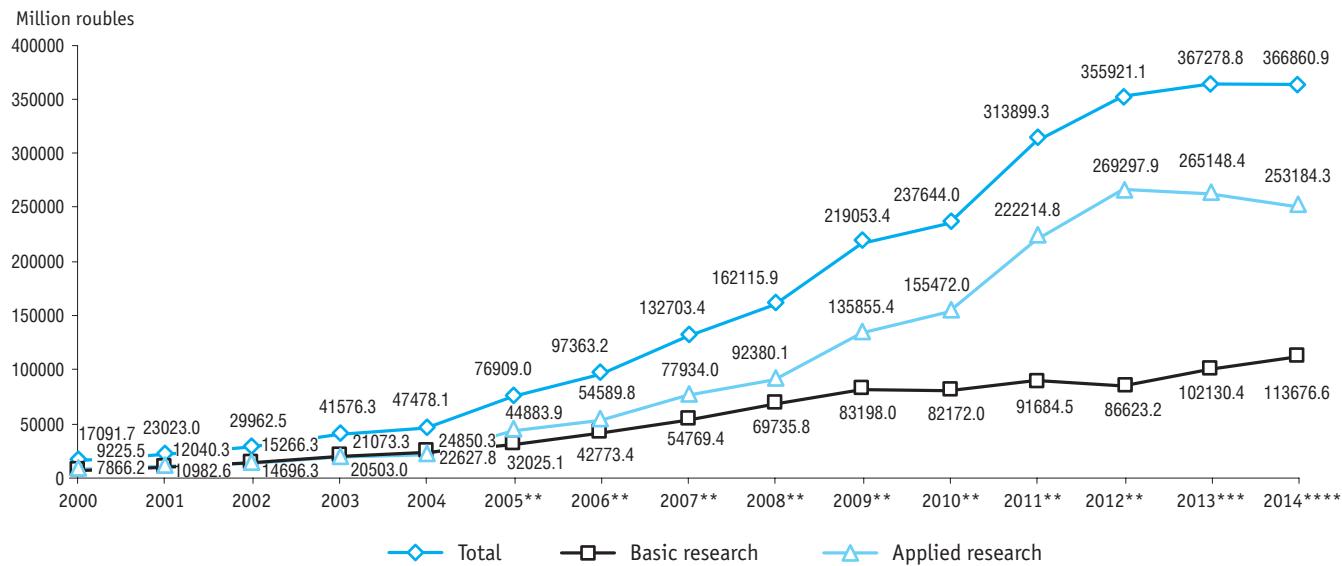

**Gross domestic expenditure on R&D
as a percentage of gross domestic product**

3.2. TRENDS IN GROSS DOMESTIC EXPENDITURE ON R&D (at constant 1989 prices)

3.3. FEDERAL BUDGET APPROPRIATIONS ON CIVIL S&T AT CURRENT PRICES*

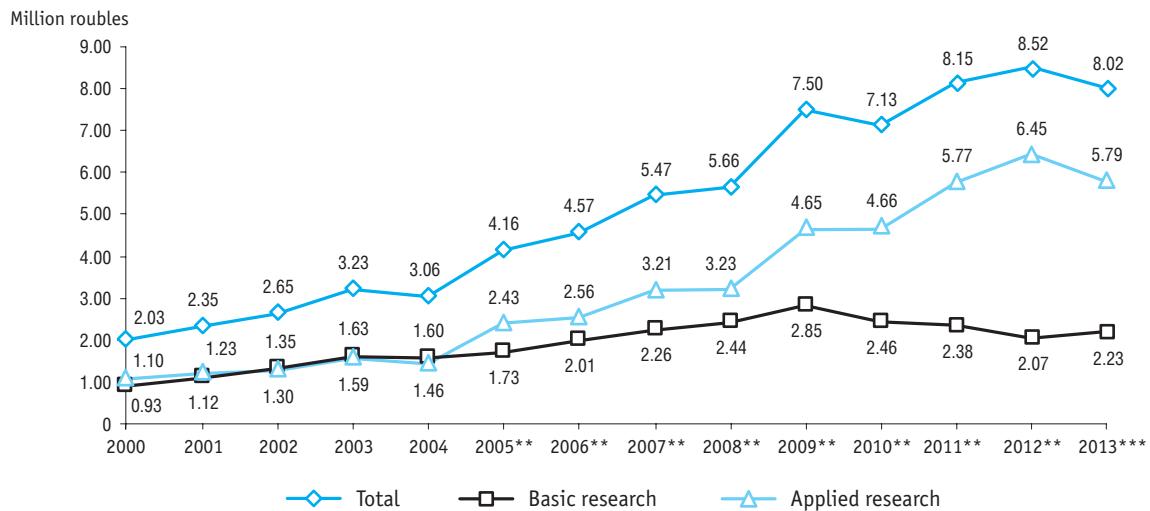

* 2000–2004: appropriations in Section 06 ‘Basic Research and Promotion of Science and Technology Progress’ of the federal budget and its subsections.

** Source for 2005–2011: reports on the implementation of the consolidated budget and budgets of the state non-budget funds (data is provided by the Federal Treasury).

*** According to the Federal law ‘About Federal budget for 2013 and for the planned period 2014–2015’ (with changes and additions).

**** According to the Federal law ‘About Federal budget for 2014 and for the planned period 2015–2016’.

3.4. FEDERAL BUDGET APPROPRIATIONS ON CIVIL S&T AT CURRENT 1991 PRICES*

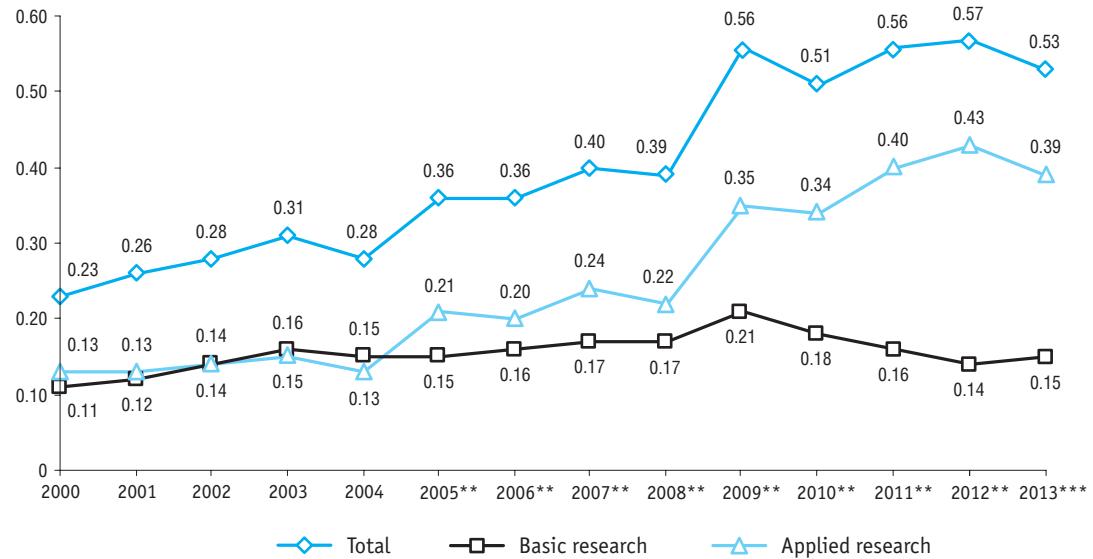

* 2000–2004: appropriations in Section 06 ‘Basic Research and Promotion of Science and Technology Progress’ of the federal budget and its subsections.

** Source for 2005–2012: reports on the implementation of the consolidated budget and budgets of the state non-budget funds (data is provided by the Federal Treasury).

*** According to the Federal law ‘About Federal budget for 2013 and for the planned period 2014–2015’ (with changes and additions).

3.5. FEDERAL BUDGET APPROPRIATIONS ON CIVIL S&T AS A PERCENTAGE OF GROSS DOMESTIC PRODUCT*

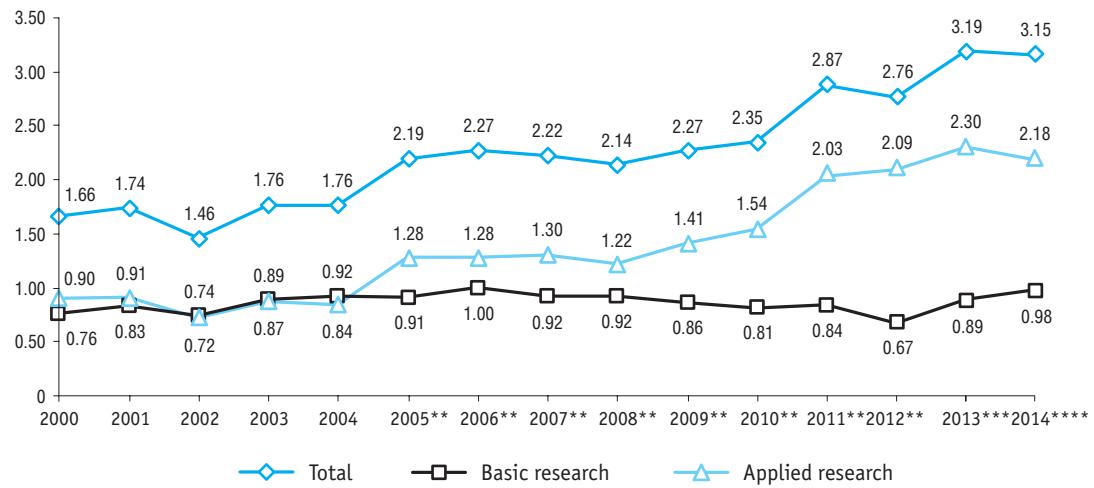

* 2000–2004: appropriations in Section 06 ‘Basic Research and Promotion of Science and Technology Progress’ of the federal budget and its subsections.

** Source for 2005–2012: reports on the implementation of the consolidated budget and budgets of the state non-budget funds (data is provided by the Federal Treasury).

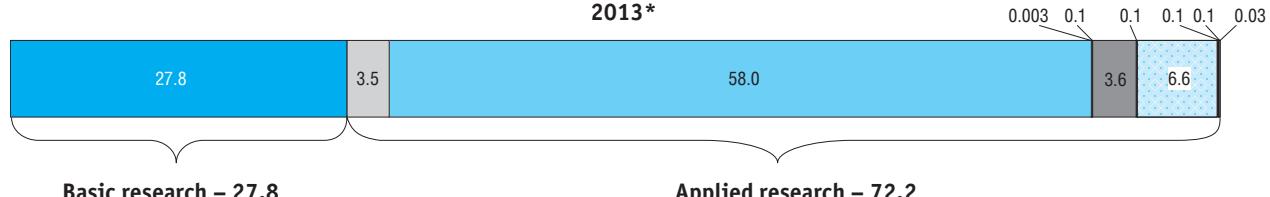

*** Estimates.

3.6. FEDERAL BUDGET APPROPRIATIONS ON CIVIL S&T AS A PERCENTAGE OF FEDERAL BUDGET EXPENDITURE*

3.7. PERCENTAGE DISTRIBUTION OF FEDERAL BUDGET APPROPRIATIONS ON CIVIL S&T BY SECTION OF BUDGET EXPENDITURE CLASSIFICATION AND TYPE OF ACTIVITY

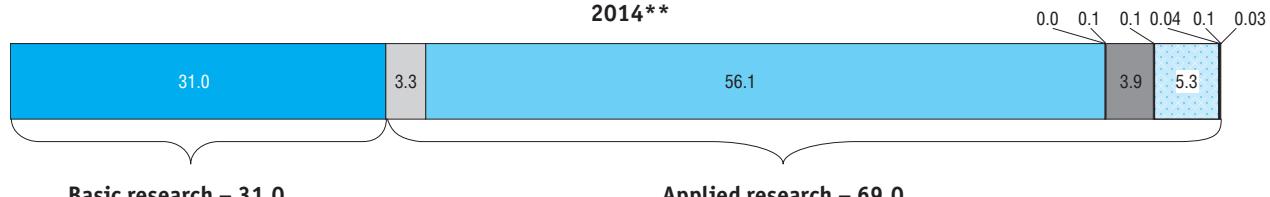

2013*

Basic research – 27.8

Applied research – 72.2

2014**

Basic research – 31.0

Applied research – 69.0

General government issues

National economy

Housing and communal services

Environmental protection

Education

Culture, cinema

Health care

Social policy

Physical training and sport

Mass media

* According to the Federal law 'About Federal budget for 2013 and for the planned period 2014–2015' (with changes and additions).

** According to the Federal law 'About Federal budget for 2014 and for the planned period 2015–2016'.

7.2. ENTERPRISES ENGAGED IN TECHNOLOGICAL INNOVATION AS A PERCENTAGE OF ALL ENTERPRISES BY ECONOMIC ACTIVITY

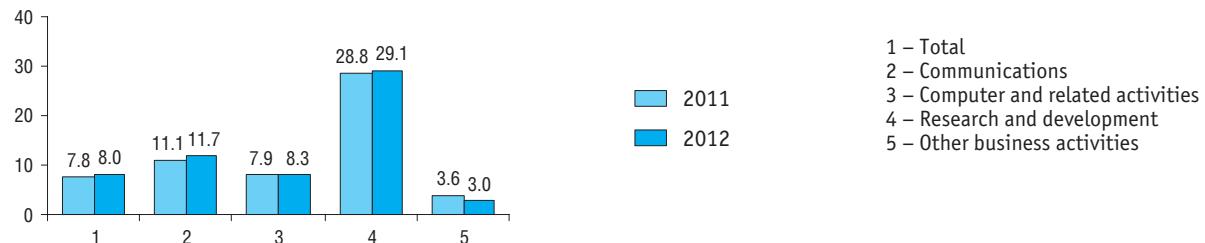

Mining and quarrying, manufacturing, electricity, gas and water supply

- 1 – Total
- 2 – Mining and quarrying
 - 3 – Mining and quarrying of energy producing materials
 - 4 – Mining and quarrying, except energy producing materials
- 5 – Manufacturing
 - 6 – High tech
 - 7 – Manufacture of pharmaceuticals
 - 8 – Manufacture of office machinery and computers
 - 9 – Manufacture of radio, television and communication equipment and apparatus
 - 10 – Manufacture of medical, precision and optical instruments, watches and clocks
 - 11 – Manufacture of aircrafts, including spacecrafts
 - 12 – Medium high tech
 - 13 – Manufacture of chemicals and chemical products
 - 14 – Manufacture of machinery and equipment, n.e.c.
 - 15 – Manufacture of electrical machinery and apparatus
 - 16 – Manufacture of motor vehicles, trailers and semi-trailers
 - 17 – Manufacture of other transport vehicles
 - 18 – Medium low tech

- 19 – Manufacture of coke, refined petroleum products
- 20 – Manufacture of rubber and plastic products
- 21 – Manufacture of other non-metallic mineral products
- 22 – Manufacture of basic metals
- 23 – Manufacture of fabricated metal products
- 24 – Construction and repair of vessels
- 25 – Low tech
 - 26 – Manufacture of food products and beverages
 - 27 – Manufacture of tobacco products
 - 28 – Manufacture of textiles
 - 29 – Manufacture of wearing apparel, dressing and dyeing of fur
 - 30 – Manufacture of leather, leather products and footwear
 - 31 – Manufacture of wood and of products of wood and cork, except furniture
 - 32 – Manufacture of cellulose, wood pulp, paper and cardboard and appropriate paper products
 - 33 – Publishing and printing, reproduction of recorded media
 - 34 – Manufacture of furniture; manufacturing n.e.c.
 - 35 – Recycling
- 36 – Electricity, gas and water supply

7.10. INTENSITY OF EXPENDITURE ON TECHNOLOGICAL INNOVATION BY ECONOMIC ACTIVITY

(expenditure on technological innovation as a percentage of total sales)

Mining and quarrying, manufacturing, electricity, gas and water supply

(continued)

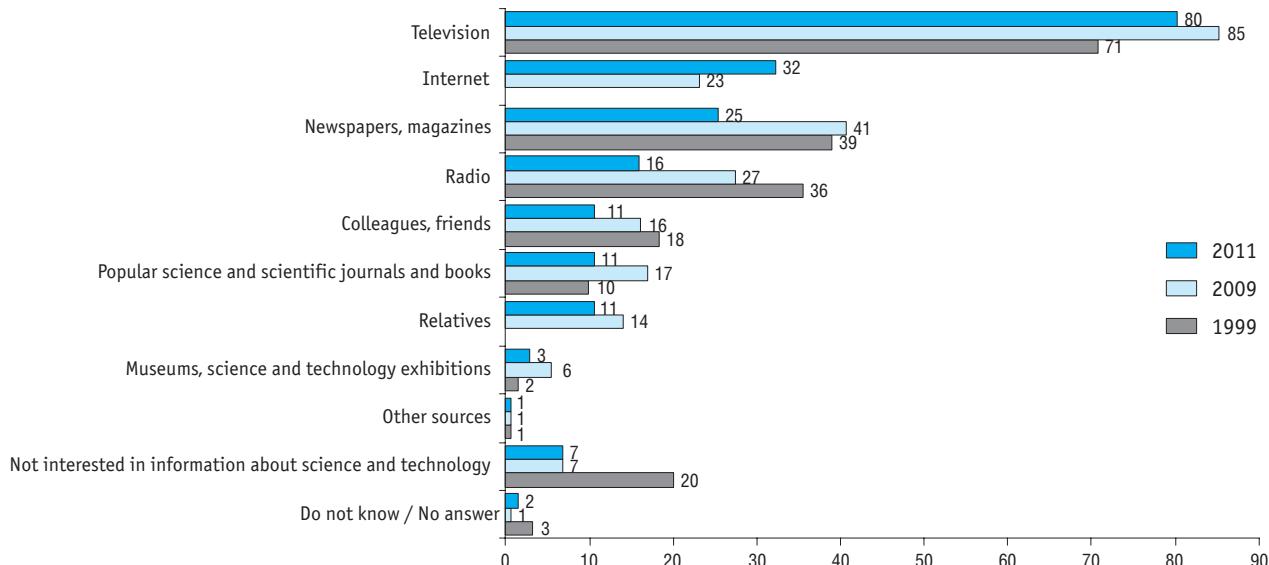

Communications, computer and related activities, research and development, other business activities

8. Public Attitudes towards Science and Technology

8.1. SOURCES OF INFORMATION ABOUT SCIENCE AND TECHNOLOGY*

(respondents who indicated certain sources of information as a percentage of all respondents **)

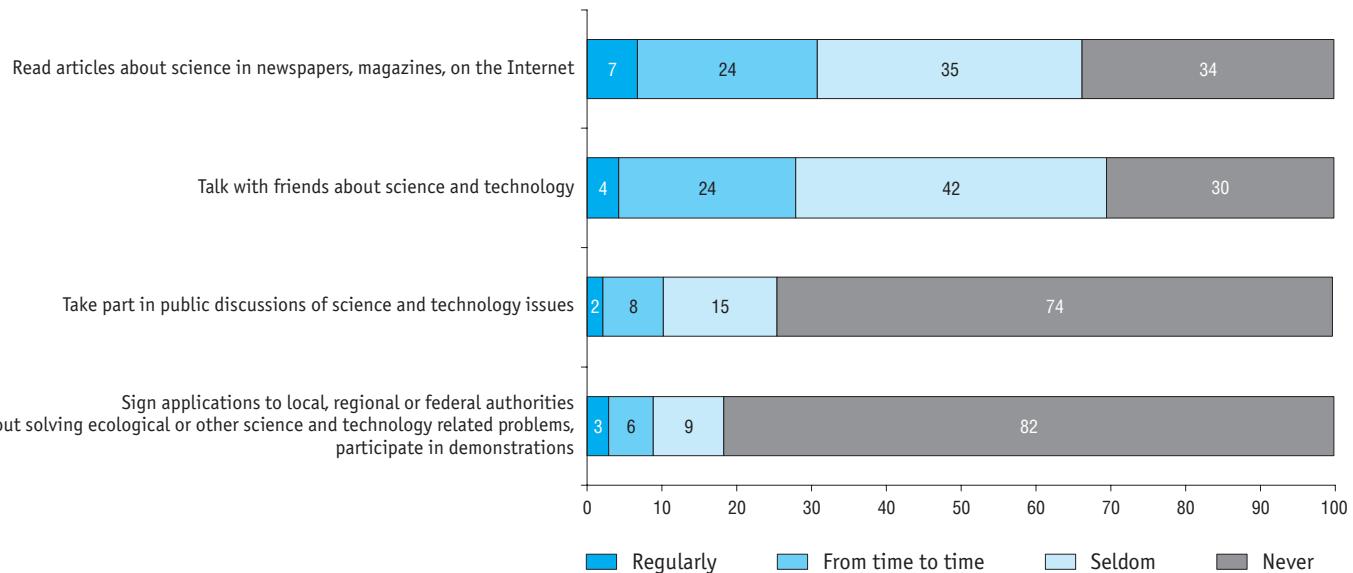

* In this section the data for Russia is based on the results of the representative surveys of the adult population, organised by HSE Institute for Statistical Studies and Economics of Knowledge. The data sources for the European countries are: *Special Eurobarometer 340. Science and Technology*. Luxembourg: Directorate-General for Communication, 2010; *Special Eurobarometer 224. Europeans, Science and Technology*. Luxembourg: Office for Official Publications of the European Communities, 2005; for the United States and other countries the following data sources were used: *National Science Board. Science and Engineering Indicators – 2008*. Washington, D.C.: US Government Printing Office, 2008; *National Science Board. Science and Engineering Indicators – 2010*. Arlington, VA: National Science Foundation, 2010; *Science and Engineering Indicators – 2012*. Arlington, VA: National Science Foundation, 2012.

** The total exceeds 100%, as the respondents could give multiple answers.

8.2. INVOLVEMENT OF THE POPULATION IN SCIENCE AND TECHNOLOGY ISSUES: 2011

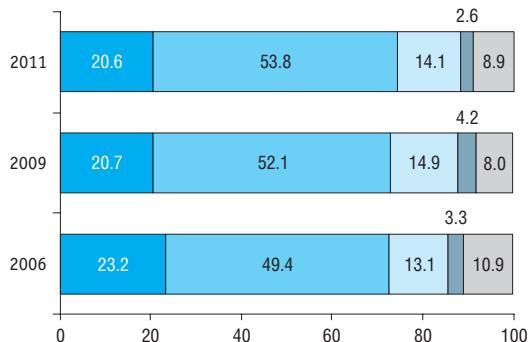

(respondents who are engaged in certain activities as a percentage of all respondents)

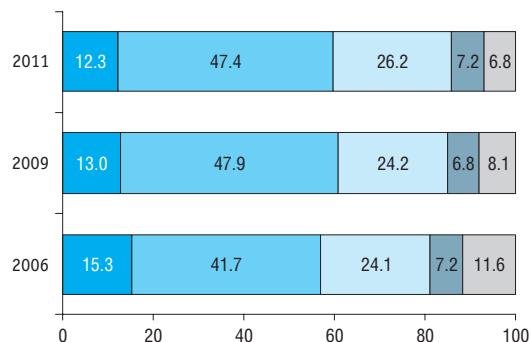

8.3. PUBLIC ASSESSMENT OF THE INFLUENCE OF SCIENCE AND TECHNOLOGY ON LIFE (as a percentage of all respondents)

Russia: Do you agree with the following statements?

'Science and technology make life easier,
healthier and more comfortable'

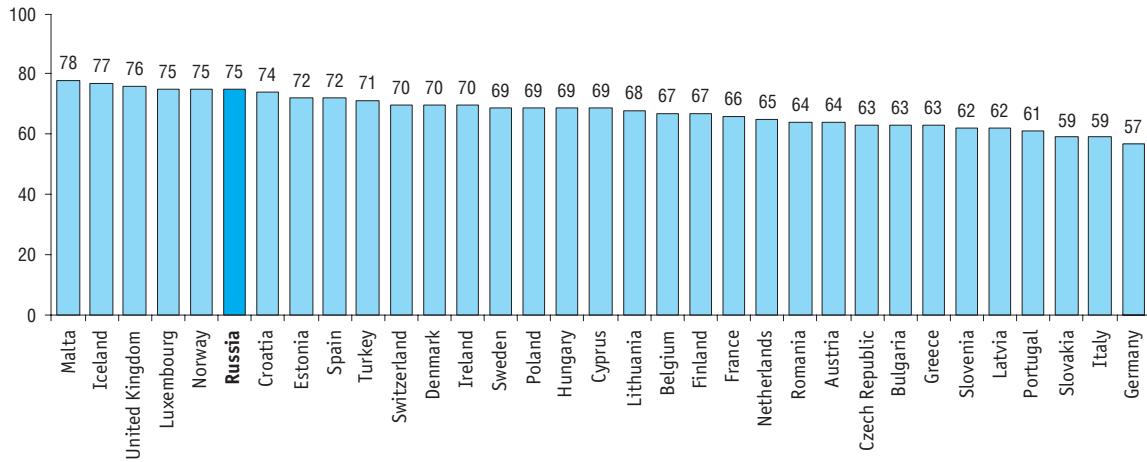

'Science and technology change life and make it more restless'

- █ Strongly agree
- █ Somewhat agree
- █ Somewhat disagree
- █ Strongly disagree
- █ No opinion

(continued)

'Science and technology make life easier, healthier and more comfortable'*

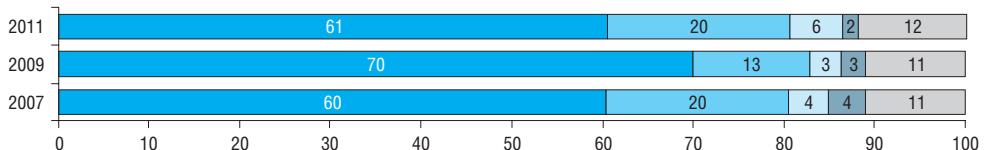

* The data on Russia is for 2011. The data on other countries is for 2010. The answers 'strongly agree' and 'somewhat agree' were taken into account.

8.4. PUBLIC ASSESSMENTS OF THE EFFECTS OF S&T DEVELOPMENT

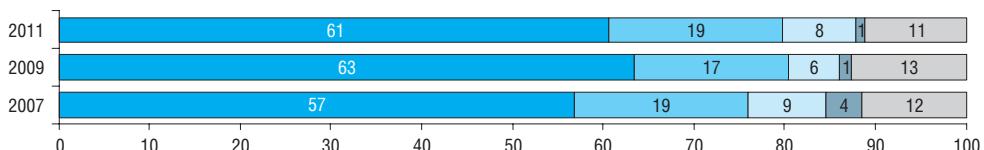

(as a percentage of all respondents)

'How will the following technologies influence our life in the next 20 years?'

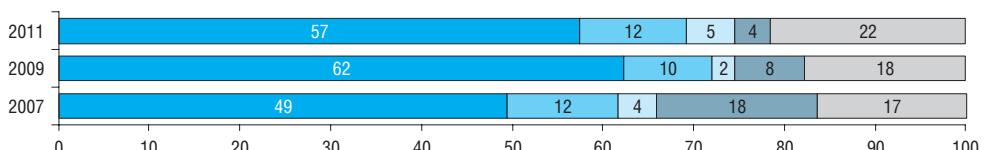

Energy saving technologies

Internet

Nanotechnology

█ Improve

█ Will not influence

█ Impair

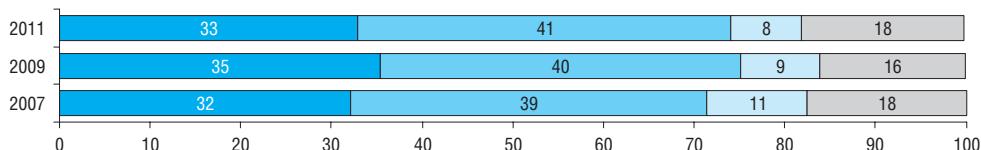

█ Haven't heard of that
of that

█ Don't know /
No opinion

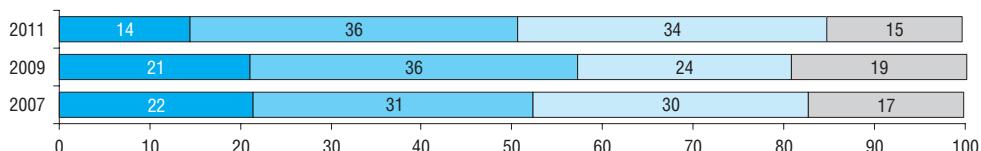

(continued)

'What kind of influence will the following technologies have on people's health?'

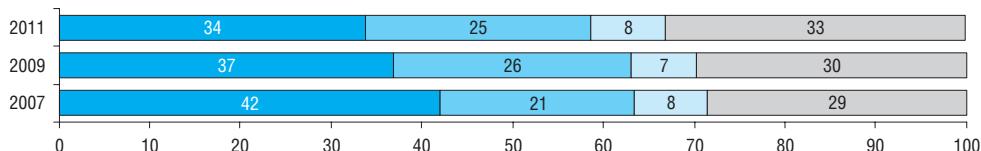

Energy saving technologies

Internet

Nanotechnology

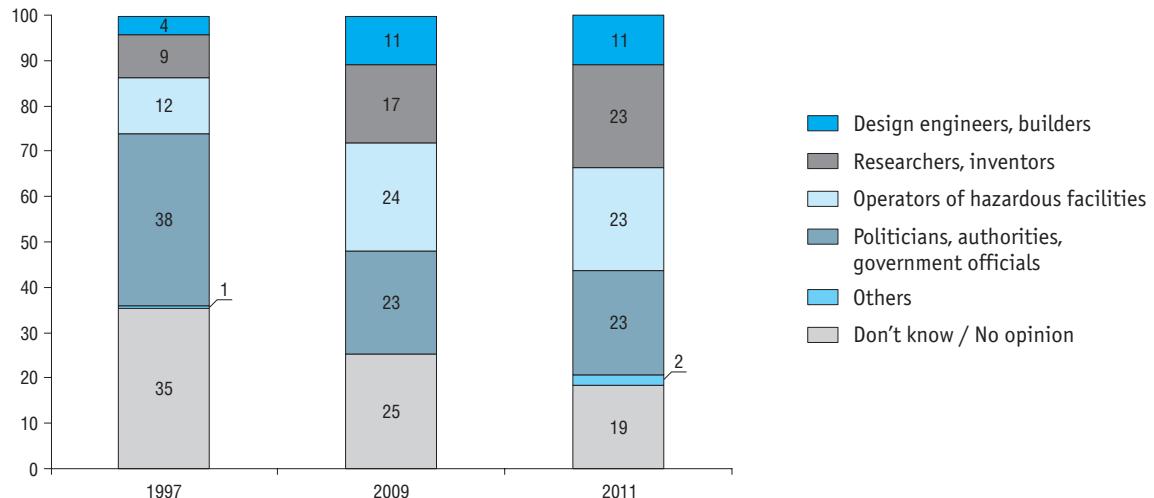

Positive

No influence

Negative

Don't know / No opinion

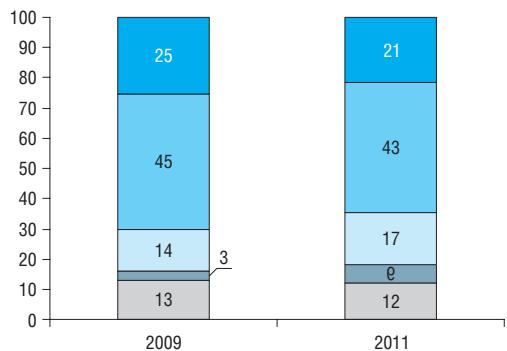

8.5. PUBLIC OPINION ABOUT THOSE RESPONSIBLE FOR THE NEGATIVE EFFECTS OF S&T DEVELOPMENT
(as a percentage of all respondents)

8.6. PUBLIC OPINION ABOUT POSSIBLE PROHIBITION OF RESEARCH (as a percentage of all respondents)

Do you agree with the following statements?

'If some research is likely to not only benefit the humanity
but to harm it, such research should be banned'

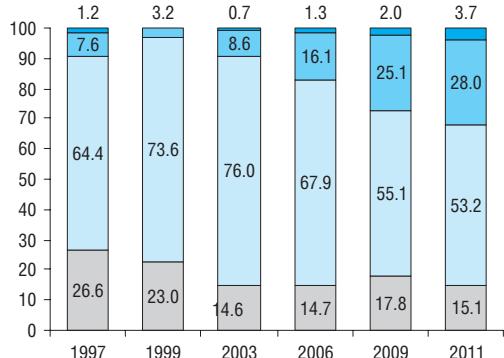

'Research should be conducted on any topic,
prohibitions are inadmissible in this regard'

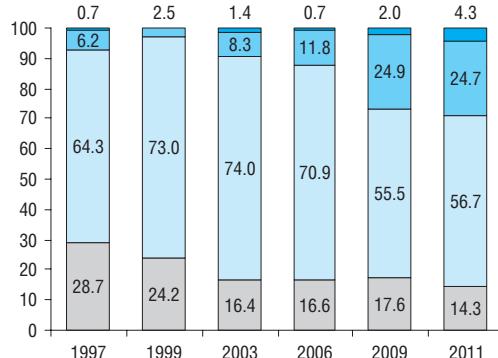

- Strongly agree
- Somewhat agree
- Somewhat disagree
- Disagree
- Don't know / No opinion

8.7. PUBLIC OPINION ABOUT FINANCING RESEARCH AND INTRODUCING NEW TECHNOLOGIES (as a percentage of all respondents)

'Is the government allocating enough funds to conduct research in Russia?'

'Is the government allocating enough funds to introduce new technologies in Russia?'

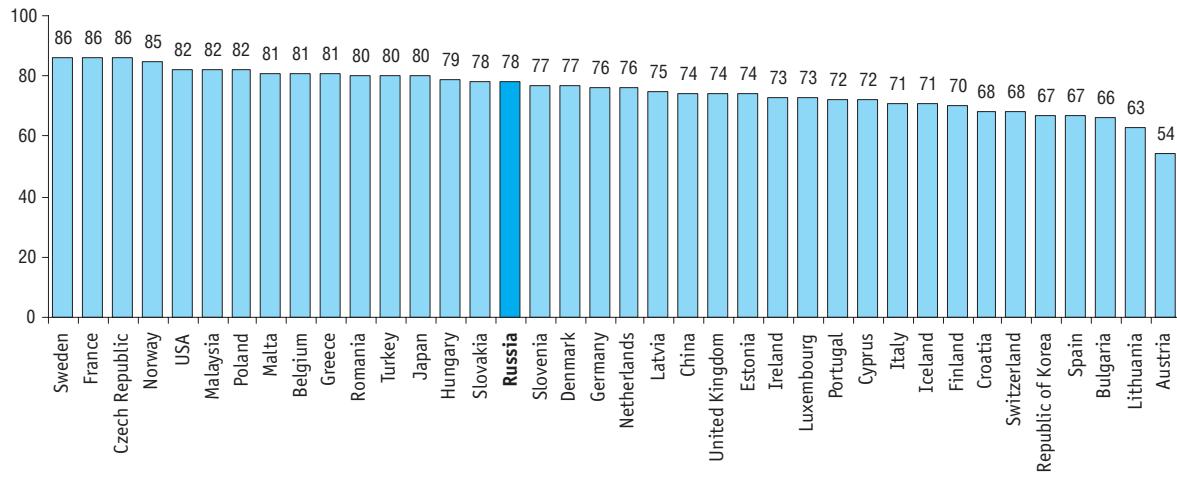

■ More than enough

■ Enough

■ Not enough

■ Don't know / No opinion

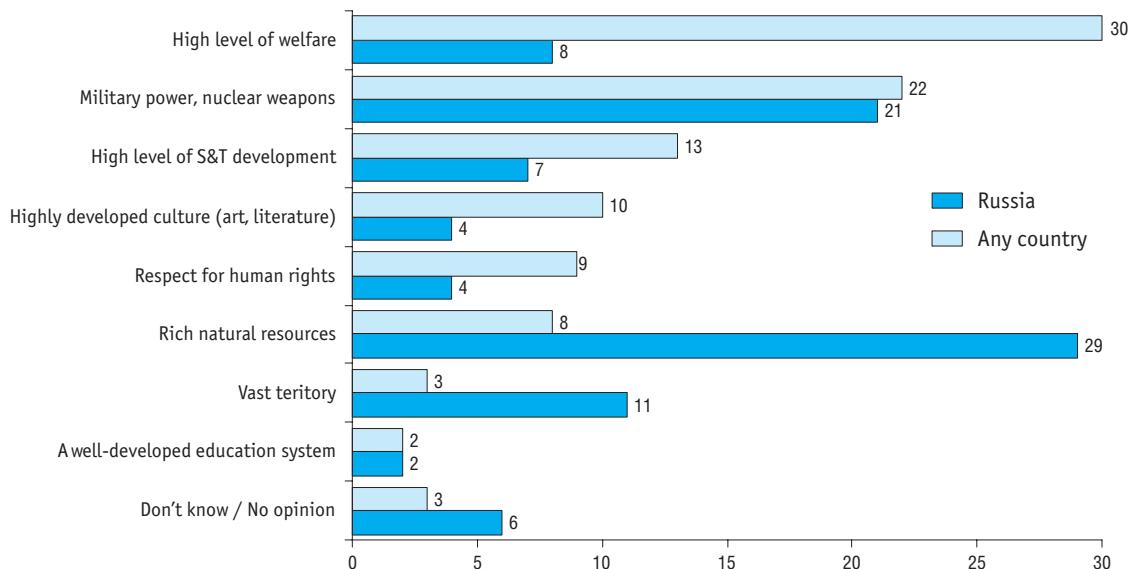

'Research should have financial support from the state' even if it does not bring immediate benefits, but increases the knowledge of mankind*

* The data for Russia is for 2011, for other countries it is for the nearest years, for which data is available.

8.8. SYMBOLS OF NATIONAL PRESTIGE IN RUSSIA: 2011

(as a percentage of all respondents*)

'What must any country possess in the first place to gain respect of other states?**What earns Russia respect among other countries in the first place?'**

* The total exceeds 100%, as the respondents could give multiple answers.

Estonia	6296	36278	5.76
Finland	49387	340636	6.9

* The data refers to the number of publications and citations received in 2008-2012 by publications issued within the same period. Data is presented according to 'Essential Science Indicators'.

** The data on Tajikistan and Turkmenistan is excluded due to the insignificant number of publications. The calculation is based on 'Web of Science' data.
Data on the United Kingdom is presented for four constituent countries separately: England, Scotland, Wales and Northern Ireland.

TECHNICAL NOTES

Advanced manufacturing technologies – technologies and technological processes involving machines, devices, equipment and instruments based on microelectronics or computer-controlled, and used in designing, manufacturing or processing of a product.

Applied research is the original investigation that acquires new knowledge in order to solve particular problem. Applied research is undertaken to determine possible uses for the findings of basic research and aids in discovering new methods or ways of achieving specific and predetermined objectives.

Basic research is experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundation of phenomena and observable facts, without any particular application or use in view. It results in hypotheses, theories, methods, etc. Basic research can additionally provide recommendations for applied research to expose the opportunities for the practical application of the obtained results, as well as result in scientific publications, etc.

Bibliometric indicators are calculated on the basis of the Scopus and Web of Science databases. Publications considered include scientific articles, conference papers and reviews. A publication is associated with a country if it is listed in the affiliated address of the author or one of the co-authors.

Competitive research funding (programme financing) – funds received by the organization, which took the first place according to the decision of the competition commission made on the basis of summarizing the results of the competition of scientific, technical programs, innovation and other projects related to the implementation of scientific research and development, on the basis of the best conditions for the implementation

of the competitive project presented by the organisation in comparison with other participants.

Development is a systematic work drawing on existing knowledge gained from research and/or practical experience, and is directed toward producing new materials, products processes or devices, and also services, systems or methods; or to improving substantially those already produced.

Doctoral courses are one of the training forms for highly qualified R&D and teaching personnel that may lead to a Doctor of Sciences degree. Persons having a Candidate of Sciences degree can be admitted to doctoral courses. The duration of training in doctoral courses should not exceed three years.

Enterprises engaged in technological innovation are those involved in development and introduction of technologically new or improved products or services, technologically new or improved processes or techniques of service production (transfer), and other types of innovative activities.

Expenditure on innovation is the actual expenditure related to implementation of various types of innovative activity performed within an enterprise (a sector, region, country). Innovation expenditure comprises current and capital expenditure. Innovation statistics covers the expenditure of technological, organisational and marketing innovations.

Federal budget appropriations on civil S&T – federal budget funds allocated for civil basic and applied research. In accordance with the new budget classification adopted in Russia since January 1, 2005, appropriations earlier included in the subsections 0601 'Basic Research' and 0602 'Development of Perspective Technologies and Priority Objectives of S&T Progress' of section 06 'Basic Research and Promotion of Science and Tech-

nology Progress' of the federal budget are attributed to basic and applied research, respectively.

Fixed (capital) assets of research and development (R&D) comprise:

- buildings and installations;
- machinery and equipment, including experimental devices, research instruments, automation means, and computers, etc.;
- transportation means;
- instruments, appliances, and other fixed assets on the balance of R&D institutions and their experimental bases, used in their main activities.

Grants are cash and other assets that are provided free of charge and irrevocably by persons and legal entities, including foreign citizens and foreign legal entities and international organisations which have the right to provide grants to the Russian Federation in accordance with the procedures laid down by the Government of the Russian Federation, to realise specific S&T programmes and projects, innovation projects, to conduct specific research under the conditions attached by grant-makers (Federal law of August 26, 1996, № 127-Federal Act 'On science and state scientific and technical policy' (with changes and amendments)).

Gross domestic expenditure on R&D — expressed in a monetary form is the actual expenditure on research and development performed by organisations during the reference year irrespective of financing sources. Its estimation is based on statistical accounting of expenditure on R&D performed by organisations during the reference year regardless of the source of funds.

Gross domestic expenditure on R&D comprises:

- **current expenditure** – salaries, social security payments, expenditure on acquisition of equipment due to prime cost of projects, oth-

er material costs (acquired raw or fabricated materials, completing devices, half-finished products, fuel, energy, production works and services, etc.), and other current costs;

- **capital expenditure** includes those on land, construction or acquisition of buildings, acquisition of equipment included in fixed assets, etc.

Gross domestic expenditure on R&D is estimated at current and constant prices calculated using the GDP deflator.

Innovative activity of an enterprise characterises the degree of involvement an enterprise has in innovation in general, or in specific innovative activities, within a certain period. The level of innovative activity is generally defined as the ratio of enterprises engaged in technological, organisational and marketing innovations to the total enterprises surveyed in a country, sector, region, etc. within a specific period of time.

Innovative activities are all types of economic activities related to the transformation of ideas (usually the result of research and development or other scientific achievements) into technologically new or significantly improved goods and services, introduced to the market, as well as new or significantly improved technological processes used in service production (transfer) or implemented in manufacturing modes. Innovative activities incorporate scientific, technological, organisational, financial and commercial actions that lead to innovation.

Innovative goods and services are products (goods and services) that have undergone technological modification in the last three years. By degree of novelty innovative goods and services include newly introduced (or technologically modified) and improved products.

Intangible assets are the long-term resources of an entity, but have no physical existence; they derive their value from intellectual or legal rights,

and from the value they add to the other assets. These are licenses, patents, technological innovations, software, designs, other intellectual property, lease and other rights, privileges, trademarks, called invisible assets. Intangible assets are divided into those produced and non-produced. According to the Russian Classifier of Fixed Assets, produced intangible assets refer to information open to the public which is the result of intellectual activity and is recorded on a relatively low-value data storage medium, including mineral exploration (information obtained as a result of exploration); computer software; entertainment, literary and artistic originals; high-tech industrial technology; other intangible fixed assets (integrated circuits, trade secrets, "know-how", trademarks, patents), viewed as the result of creating information.

License is a legal agreement between an owner (licenser) and a grantee (licensee) on the transmission for a contingent consideration of exclusive rights to the utilization of industrial property or know-how, occurring under certain conditions and for a certain period of time. A patent license agreement provides the right to use patents, and defines the volume of transferred rights, the validity period, the territory coverage, and also the type of payment.

Marketing innovation includes newly implemented or significantly improved marketing methods, that incorporate major changes in product package and design, innovative sales, as well as the presentation and promotion of products, and new pricing strategies. Marketing innovations are aimed at better addressing customer needs and the expansion of consumer goods and services, and developing new markets with the objective of increasing a range of sales.

Organisational innovation is the implementation of a new organisational method in a firm's business practices, workplace organisation or external relations. Organisational innovations are aimed at increasing ef-

fectiveness of an enterprise performance by reducing administrative and transaction costs, improving workplace organisation (working time) and thereby increasing labour productivity, gaining access to market assets, and reducing supply costs.

Patent for invention is a document granted by the government to an inventor that entitles priority, authorship and exclusive right to use the invention for an agreed period of operation.

Postgraduate courses are the main form of training the teaching and R&D personnel in the system of postgraduate professional education that may lead to a Candidate of Sciences degree. In accordance with the current Nomenclature of Scientific Occupations accepted in the Russian Federation, postgraduate training is implemented by a field of science and technology and scientific discipline. Persons having higher (university or equivalent) education are admitted to postgraduate courses. Postgraduate training includes full-time or part-time forms. The duration of study in the former case should not exceed three years, in the latter, four years.

R&D personnel is a population of persons whose creative activities are aimed at the advancement of scientific knowledge or search for new areas of its application, as well as direct services related to performance of R&D. R&D personnel is subdivided into the following categories:

- **researchers** are professionals engaged in R&D and immediately performing the creation of new knowledge, products, processes, methods, and systems, as well as in the management of these activities. Researchers usually have higher education (university or equivalent) degrees;
- **technicians** take part in R&D, performing technical functions, as a rule, under the supervision of researchers. Technicians generally have secondary professional education and (or) the necessary professional experience and knowledge;

- **supporting staff** includes staff members performing supporting functions connected with R&D: employees of planning and finance units, patent services, S&T information units, S&T libraries; workers engaged in assembling, adjusting, maintaining and repairing scientific equipment and instruments; workers of pilot (experimental) production units; laboratory assistants without higher or secondary professional education;
- **other auxiliary personnel** includes staff members performing general functions connected with the activities of an organization as a whole (employees of accounting departments, personnel departments, units for material and technical supplies, secretarial and clerical staff, etc.).

Research and development (R&D) – the term comprises creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture and society, and the use of this stock of knowledge to devise new applications.

Sectors of R&D performance:

- government sector includes institutions subordinated to government ministries and agencies, responsible for state administration and satisfaction of public needs in general, as well as non-profit institutions completely or mainly financed and controlled by the government;
- business enterprise sector includes all organisations and enterprises whose main activity is connected with the production of goods or services for sale, including those owned by the state, as well as private non-profit institutions serving the abovementioned organisations;
- higher education sector includes universities and other higher education institutions irrespective of financing sources and legal sta-

tus, as well as research institutes, experimental stations, and clinics directly controlled by higher education institutions, or associated with them;

- private non-profit sector consists of private institutions that are not aiming to gain profit (professional societies, voluntary associations, etc.) and private individual organisations.

Sources of R&D funding – primary sources of financing R&D. They are determined based on the fact of the direct transfer of funds from the institution-customer to the institution-performer. As a whole, R&D funds of the reporting institution are divided into those which can be attributed as their own and those that are received from other external institutions.

The sources of R&D funding include:

- government (including the federal budget, regional and local (municipal) budgets);
- general university funds;
- non-budget funds (Russian Foundation for Technological Development, regional development funds, sectoral and intersectoral funds for research and experimental development, regional ecological funds, etc.);
- funds from abroad;
- government sector institutions' funds;
- business enterprise sector funds;
- higher education sector funds;
- private non-profit sector funds;
- own funds of institutions.

Technological innovations are the final result of innovative activities, embodied in a technologically new or improved good or service introduced on a market, a technologically new or improved process or technique of service

production (transfer) used in practice. An accomplished innovation is one that is introduced to the market or implemented into the production process.

Technology balance of payments registers the volume of commercial transactions related to international technology and other intangible assets transfers (exports and imports).

Trade in technology with foreign countries comprises of all contracts on exports and imports of technologies and engineering services, including contracts between joint ventures and foreign enterprises registered in Russia, as well as their branches (offices) registered in Russia and their foreign mother companies.
