

Kuniko Urashima, PhD, Deputy Director, Science and Technology
Foresight Centre, National Institute of Science and Technology
Policy (NISTEP), Japan

Kuniko Urashima is a Deputy Director at the Science and Technology Foresight Centre. Dr. Urashima joined the NISTEP in 2003 with prior professional experiences in the fields of environmental pollutant treatment and removal technologies using plasma technology at electric manufacturers, universities, national institutes, and a company in Japan, Canada, the United States, and France. Her main duty is to investigate global and general trends in science and technology on the environment and energy.
