

Victor Yanush

Researcher at BayesGroup.

+ 7-977-857-72-56
yanushvictor@gmail.com

EXPERIENCE

Samsung-HSE Joint Lab, Moscow— *Intern Researcher*

May 2018 - ...

Doing my research in the area of machine learning, especially deep learning and Bayesian methods.

Yandex, Moscow— *Intern Developer*

July 2016 - November 2016

Worked as an intern on the project of multilingual query processing with deep learning for Yandex.Maps.

MSU Institute of Mechanics, Moscow— *Programmer*

October 2014 - November 2015

Automatic processing of documents and people in system “Istina MSU”.

EDUCATION

CMC MSU, Moscow— *Bachelor*

September 2014 - June 2018

Bachelor at the Department of Mathematical Methods of Forecasting under the guidance of Dmitry Kropotov.

PROJECTS

Reinforcement learning methods

Implementation of different reinforcement learning methods in Tensorflow (code is on Github).

Generative Adversarial Networks

Implementation of different types of generative adversarial networks using PyTorch (code is on Github).

Meta-optimization

This project is what my bachelor degree about: trainable optimization methods based on recurrent neural networks. It is implemented using two

SKILLS

Machine learning.

Deep learning.

Data science.

Bayesian methods.

Programming.

LANGUAGES

Russian — native.

English — upper intermediate

methods: supervised learning and reinforcement learning.
