in Economics
Minutes No. 2,
dated March 13, 2018

ADDITIONAL CRITERIA FOR DOCUMENTS SUBMITTED TO HSE UNIVERSITY'S DISSERTATION COMMITTEE

DISSERTATION SUMMARY CRITERIA

Summaries must describe the problems considered by a dissertation and the key results of the research, including the following elements:

- title of thesis;
- author's name;
- author's affiliation;
- supervisor's name;
- JEL codes;
- objectives of research;
- relevance;
- brief literature overview;
- research methodology;
- key findings;
- contribution;
- list of author's original articles.

The sequence and format for inclusion of the aforementioned elements may be selected by the author. The summary must be presented in both Russian and English.

A summary usually should be no longer than 0.75 of a standard author's page for a Candidate of Science dissertation and 1.5 author's pages for a Doctor of Science dissertation.

A dissertation summary in English should correspond to the text provided in Russian.

Important: It is crucial to spend time and focus on one's summary. It is the summary that will provide an initial impression of the candidate for the experts and members of the committee. The language should be concise, clear, and convincing, thereby producing a positive impression on the reader so that he/she can clearly see its strong points. A poorly written summary can have an immediate negative impact and ruin the overall impression of the work, i.e. the author themselves doesn't understand or can explain the essence and the value of the research, or he/she has an indifferent attitude towards the dissertation work.

DISSERTATION CRITERIA

As per p. 3.5 of the Regulations on Conferring Academic Degrees at HSE University, when including in the dissertation research outcomes that have been produced or co-authored by the candidate for the academic title, he/she must cite this in the dissertation text. This means that authors publications on the subject of the dissertation must be featured on the list of bibliography used while the dissertation must have links to such articles.

DOCUMENTS CRITERIA

All documents which are, as per the parts of the Regulations on Conferring Academic Degrees at HSE University, submitted electronically (e.g., dissertation, summary in Russian and English, articles with publication information) shall be presented in the pdf format. Each file should include the last name of the candidate (e.g., Ivanov_dissertation.pdf).

In addition to a dissertation, a summary and articles, feedback from an academic supervisor and an evaluation from the relevant HSE University's subdivision where the candidate is employed/studies, or from an outside institution where the dissertation was completed, must be provided electronically.
