Evaluation of the professional training level

Surveyed graduates indicate rather a high level of satisfaction with the experience at the Master's Programme

77% are generally satisfied with the overall structure and the contents of the Master's Programme

84% are satisfied with the quality of teaching

76% reported that they could recommend the Master's Programme to their colleagues, friends and partners

Many of them underlined the practical and academic focus of the Programme, by saying that they would recommend it for those who have a strong interest to science, technology and innovation, currently work in this field (or plan to in future), or have their own technological business

Their attitude and trust are inspired by the advantages they see in the Master's Programme

Readiness to participate in the Master's Programme implementation and development

59% stand ready to work with the Programme in future and are willing to contribute to its development

We will stay in touch with these volunteers and hope to see them on board in different roles in the upcoming year already

Instead of conclusions

In the survey, we have asked our alumni to list important outcomes of the Master's Programme for them personally. Among various skills and knowledge, improved expertise and better career chances, one outcome took an outstanding position and was repeatedly mentioned by most graduates.

- Good classmates
- Great people
- New contacts and new friends
- An amazing network of alumni and coursemates

That's true. We always have a great team of students. Take your chance to join it.
