

Special Issue

CORPORATE STRATEGIES IN DYNAMIC COMPLEXITY

Issue
4/2020

**Submission
Deadline**
01.10.2020

Guest Editor — **Helena Knyazeva**, Professor, School of Philosophy, National Research University Higher School of Economics

The special issue is considered as a platform for sharing research results aimed at the aiding in the development of corporate strategies based on the achievements of the modern science of complex systems.

The recent approaches to building corporate strategies are discussed, in which priority is given to holistic, systemic and non-linear vision. Articles are welcomed whose focus is on dynamic complexity, innovative strategies, opportunities and limitations in the use of agile, reframing, scenario planning, non-linear management.

Suggested topics

Suggested contributions include, but are not limited to:

- Overview of emerging and future trends in building corporate strategies.
- New approaches to forecasting, based on knowledge of the laws governing the functioning and development of complex systems.
- Digitalization of economics, science and education, all penetrating information technologies and their impact on corporate strategies.
- Trends of education reform that respond to new challenges in the corporate sector.
- The complexity of economic, technological, financial, and investment systems: a general methodology and case studies.
- Strategies and approaches for the development of circular, closed-loop economy.
- Achievements of interdisciplinary research in the field of systemic, critical and creative thinking and management of dynamic complexity.
