Отчет о прохождении практики Internship Report

Ф.И.О. студента / Full name of the student

John Doe

Курс / Year of study: 2 , Группа / Group number: **MHRPP181**

Вид практики / Form of internship: *Производственная практика/ Work Oriented Internship*

Координатор практики от кафедры / Supervisor at the Master's Program

Ivan Ivanovich Ivanov, professor

Руководитель практики от предприятия, учреждения /

Internship Coordinator at the organization:

Kiseleva Cristina Andreevna

Место прохождения практики /

Internship took place at the organization (name):

"Kids are Kids" Integration Center

Подразделение, в котором проходила практика /

Branch, department etc. of the internship organization

Fundraising department

Обобщенное описание выполненной во время практики работы /

Summary of the work done during internship:

In the Integration Center, I was mostly engaged in preparation of analytical and information materials about the refugee and migrant situation in the Russian Federation, refugee and migrant education and about the Integration Center itself. Assignments I got were related to data collection and analytical materials for future use by the Center. Also, as part of data gathering I needed to translate information from foreign languages to Russian.

Какие новые знания, навыки Вы приобрели во время практики?

What skills and knowledge did you acquire during your internship?

Throughout the internship, I was able to observe the role of the NGO, working with migrants and refugees under 18 years old and their adaptation in Russia and integration into the Russian society, which will be reflected in the thesis. Moreover, internship was useful in terms of consultations with Internship coordinator, representative from the department of education in one of the regions of the Russian Federation, and other specialists working in the field of education in general and migrant and refugee education in particular. Such consultations were helpful with regards to my misunderstandings of the current situation with refugee education in Russia, with regards to general characterization on how Russian migration and educational policies are implemented and how actors are functioning in the field. In Addition, while I was having the internship at the Russian NGO, I had two interviews with an expert from Greek NGO working in this field (SolidarityNow) and an expert from UNHCR Greece. So, throughout the internship I could actually compare the two cases from practical aspects, i.e., for example, what problems do NGOs face in Russia and Greece, what are the main challenges for refugee children in the countries, what are the roles of national NGOs in combating such challenges and issues, and what are the main differences and similarities in the national policies.

Общая характеристика работы учреждения и подразделения, где вы проходили практику. Описание содержания деятельности подразделения, в котором работал практикант, и того проекта, в котором он участвовал, а также иных видов деятельности, осуществленных с участием практиканта / Summary of the activity your internship organization carries out:

"Kids are Kids" Integration Center for refugee and migrant children is a non-governmental non-profit organization that works with children from 3 to 18 years old who come from various countries all over the world and come to Russia as a country of destination. The Center is engaged in providing several courses and educational/cultural programs for people of concern, as well as assistance to get access to school education if children lack such access.

The Center does not have departments; it works as a whole entity with various functions, whether it is direct work with migrants and refugees or organizational activities.

С какими проблемами Вы столкнулись во время практики (в т.ч. психологическими)? Which challenges (including psychological ones) did you encounter during your internship?

During the internship I found myself thinking that I am not yet prepared to work with children that well. I feel that I need some background and skills in social work with migrants and refugees, and children in general. I understood that for my future work in this field I will need such skills, as sometimes, there may be an urgent need for competences and expertise in psychology due to specific features of working with children with refugee background, there are sometimes post-trauma situations. Moreover, working with migrant and refugee children will require more competences to deal with social-emotional development and behavior. Therefore, before the internship I asked my coordinator whether I could have an internship with a focus on organizational and informational support, etc.

Moreover, I am glad that I will continue working as a volunteer at the Center, as I want to continue cooperating with the Center offering skills, knowledge and competences that I have and learning the skills of social work with migrants and refugees in the country of destination.

Ваши пожелания относительно организационной и содержательной стороны проведения практики / Your recommendations on the content and organizational side of internship:
N/A

Подпись студента / Signature of student _____

Приложение / Appendix (Здесь необходимо разместить подготовленные во время прохождения практики материалы, которые предполагается использовать в диссертации: инструментарий, описание процедуры исследования, описание полевых данных, таблицы, диаграммы, схемы интерпретации и другие текстовые и графические приложения. Объем раздела – до 10 стр. Также в приложении может быть представлена программа самостоятельного исследования, разработанная практикантом в рамках подготовки магистерской диссертации, если у практиканта имеется окончательный вариант такой программы.)

(In this section you have to submit documents or materials, which you have prepared during your internship and you will use in your Master's: instruments, descriptions of used methods, graphs, tables, annexes, pictures. Max – 10 pages. It is possible to attach your Master's thesis final program)
