Research in Economics

Main research seminars

Examples of the topics of research seminars

Microeconomics:

- ✓ Topics in matching and assignment markets
- ✓ Empirical Studies in International Trade and Industrial Organization
- ✓ Distortions in Monopolistic Competition Models with International Trade

Macroeconomics

- ✓ Political Economy of Institutions and Development
- ✓ Optimal macroeconomic policy under uncertainty
- ✓ Financial markets, cryptocurrencies and uncertainty

Research in Economics

- **The program for future researchers is the first stage of the unified research track "master's-PhD program"**
 - A unique scholarship program for students aiming at an academic career
- **Analogous to the first two years of the PhD program in the U.S. or Research Master in Europe**
- Training future researchers and analysts who
 - continue their studies in a Russian or foreign graduate school
 - will be in demand in various sectors and areas of the economy
- Emphasis on **fundamental training and independent research** at the modern academic level

Advantages of the track “Research in Economics”

- Teachers with research experience: leading Russian and foreign scientists with publications in international academic journals
- Academic scholarship program
- Opportunity to work at the Faculty of Economic Science while studying (teaching, research assistance)
- Opportunities for internships

Advantages of the track for students aiming for PhD studies

- Students can apply to the HSE PhD program and they do not need to take most of the courses in aspirantura
- Master's thesis under the supervision of strong researchers can become part of PhD dissertation
- Professors teaching and supervising student research at the program can provide recommendations for applying to PhD programs abroad
- Financial support for the students (scholarship, teaching and research assistance) helps students to focus on academic studies and research
