- Managing a Global Team
- Intercultural Communication
- Data Mining on Networks

Parwiz Habib,

Afganistan

The University of York (SU 2014)

By and large, I will have to admit that this is a program worth attending because you will get the real picture of Russia and meet some amazing people from not only Russia but also around the world. Therefore, I highly recommend the Summer University for anyone who wishes to learn more and enjoy their summer.

Lijia Lin,

University of Michigan

Economics and Mathematics (SU 2015)

I had two reasons for coming to the Summer University. First, I've studied Russian for one semester in my university – the Russian language has always amazed me by its word usage. I am very interested in learning Russian, which is a rather difficult language, so I came here to study Russian. At the moment I see four interesting programmes – Financial Economics, Applied Economics, Comparative Social Research and Applied Economics & Mathematical Methods – two of them are partially taught in Russian so I will need to improve my Russian. I am thinking of coming to HSE after I graduate this December to take an intensive 6-month Russian as a Foreign Language course. Hopefully, by the end of the programme I will have a sufficient knowledge of Russian.

Amandeus Van Rossum,

University College Roosevelt (Netherlands),

Political Science (SU 2015)

I took six courses. I found most of the courses interesting. I was especially interested in the EU-Russia relations and US-Russia relations. I found out a lot about Russian politics, BRICS countries, etc. And the Russian language course helped me a lot to get by in Russian. I haven't studied Russian before. When I got here, I didn't speak Russian at all, and now I can read it and speak it.
