

# Call for Papers

## Topics of Interest

Main topics of interest include, but are not limited to:

- foundations
- concept lattices and related structures
- attribute implications and data dependencies
- data preprocessing
- redundancy and dimensionality reduction
- information retrieval
- classification
- clustering
- association rules and other data dependencies
- ontologies

## Submissions

We invite scientific publications on theory and applications of Formal Concept Analysis. Papers may be submitted in PDF or Postscript format. Papers need to be formatted using the [Springer LNCS style](#).

The submission is to be done via <https://easychair.org/conferences/?conf=fca4kd>.

## Important Dates

- Submission of abstract: February 27, 2017
- Submission of full paper: March 6, 2017
- Notification of acceptance: May 15, 2017
- Workshop: June 1, 2017
- Camera ready due: July 31, 2017
